## Online Training for Educators in Charge of Preparing the Content of Digital Soft Skills Courses

As part of **Work Package 4 (WP4)**, The **Learning Digital Soft Skills Journey** of the **Digit Africa Project**, online training sessions were organized for educators in charge of preparing and developing the content of Digital Soft Skills courses.

The training aimed to strengthen educators' capacity to design relevant, engaging and high-quality learning content, while promoting effective pedagogical approaches for developing learners' digital soft skills. The sessions also provided an opportunity for educators to exchange experiences, share good practices and discuss challenges related to the development of Digital Soft Skills learning materials.

## Multilingual Online Sessions

Given the multilingual nature of the Digit Africa consortium, two online sessions were organised:

- English-language session: October 3, 2025
- French-language session: October 10, 2025

The training sessions focused on key principles and practical approaches for preparing Digital Soft Skills course content and learning materials adapted to learners' needs and to the requirements of digital learning environments.
